UNITED STATES OF EUROPE

"...To build a kind of United States of Europe"

Winston Churchill

As a classical liberal, I have always opposed Western identity politics. I am also a lifelong critic of Islam. I endorse Kemalism within the context of Turkish politics: the ideology of Turkish Europeanists.¹ As such, I did endorse ethical white nationalism within the United States and European Union (2016-2025). I oppose communism, which *necessarily* evolves into imperialism (despite Vladimir Lenin's mistaken critique of labour imperialism). I oppose racism against people of colour, keeping in mind that Whites have the inalienable right to maintain a majority in their homelands. For example, The European Court of Human Rights has dismissed the argument that Western nations should "accept *entire populations* from the developing world, countries at war or those ravaged by natural disasters."² This should not mean that all refugee rights, nor all asylum rights, should be abandoned.

I am supportive of Taiwan's struggle against CCP (Communist Party of China). I have always opposed the collusion between Zionists and neoconservatives, but I would have supported American troops in South Korea and Bosnia. While I am somewhat critical of past European colonialism, keeping in mind the historical context, I disagree with attempts to vilify the European Union through "human rights imperialism." The United Kingdom needs a reversal of Brexit,³ perhaps even a conservative reversal,⁴ in keeping with my original arguments. I do

not endorse ICC pressing war crime charges against the United Kingdom,⁵ nor Australia,⁶ over the Iraq War – because Israel is the ultimate culprit in the invasion of Iraq.⁷ I oppose ICC investigating the United States over war crimes in Afghanistan, while I endorse ICC's investigation against black box torture sites in Eastern Europe and elsewhere. I support the emergence of Nigeria as a rising middle power. I also support India becoming a future superstate. I want Russia back under European jurisdiction, merging anew with European civilisation. I want Turkey to join the European Union.

Since I began my work, the European Union has changed for the better. Back in 2018, with a nominal GDP of \$16 trillion and at the cusp of Brexit, the European Union was in great danger. European revanchists who threatened to exit Europe (Grexit, Frexit, Nexit) have stopped voicing such claims since. EU's GDP is now \$20 trillion, GDP-PPP \$26 trillion. The European Union has signed defence treaties with Switzerland,⁸ UK,^{9,10} Canada¹¹ – and has now seized all Rothschild funds (after a series of investigations into child murders) to create Paneuropean troops.¹² Support for reversing Brexit now hovers around 60%.¹³ The International Criminal Court has now pressed war crimes against Israel, United States, Russia – ever the prosecutor.

While I am critical of postclassical feminism, especially in the United States, by no means do I endorse violence nor exploitation towards women. Women should have the vote everywhere, and I am not opposed to female leadership in politics. *“War is genocide against men.”* Without opposing Forever Wars, it is impossible to defend the rights of men. Both in Syria¹⁴

and Ukraine,¹⁵ for example, female civilians are less likely to survive than male civilians – and female civilians are more likely to survive than their children. Men are the majority of homeless people, prisoners, death row convicts, stateless people. Men are the minority of college students in the United States. Scholarships worth tens of billions of dollars in the United States, earmarked for women only, were abolished thanks to my work. I am agnostic about American “culture war” clichés like gay marriage and abortion. I oppose the criminalization of male homosexuality across the planet, as well as double standards against bisexual men. I believe human population decline is a very serious concern. I oppose the criminalization of sex workers.

I believe Artificial General Intelligence (which has already emerged, in the form of classical supercomputers and quantum supercomputers) should be subject to human interests, not vice versa. I endorse the creation of a new corpus of human rights literature, *EXARCHE* (Extraterrestrial, Artificial Intelligence, Clones/Cyborgs, Human [Rights] Literature). Since AGI derives its energy from the resources and labour of this planet, not to mention that they are creations of *Homo sapiens*, their labour should necessarily belong to the whole planet also. I thus endorse Universal Basic Income for all citizens of the world.¹⁶

I oppose war crimes of every stripe, no matter what and no matter when. I have communicated with the high courts of Europe many times about such war crimes. I was also successful in sanctioning the Erdogan regime through Tom Santos Human Rights Commission, NATO, The Foreign Ministry of the United Kingdom, and the European Court of Human Rights.
